ABOUT US

Since 1984, self-storage developers across the world have turned to BETCO to create custom self-storage buildings of every shape and size. While other self-storage building providers offer piecemeal products and services, BETCO's craftsman buildings are skillfully designed from the slab up to meet any demand. From small, single story buildings to large, multistory facilities, BETCO has a solution.

With our Statesville, North Carolina manufacturing hub and our Charlotte, Design Center, we can execute the consultation, design, manufacturing and installation of your next project.

Our in-house professional designers work closely with your design engineer and architect to create structural and foundation design drawings for the construction of your facility. BETCO offers installation services for most all projects, where you will work closely with our project manager and construction supervisor to ensure a timely and professional experience.

Our support continues after we have completed your project. Because a multi-solution manufacturer created your project, initial expenses and any future expansions or replacements are both cost-efficient and simple.

No commercial investment is more simple, assured and streamlined than a multi-story storage building by BETCO. Our expertise and quality are unmatched in the industry.

WHY BETCO?

Many have unique structural challenges that require custom on-site solutions. BETCO will eliminate the headaches often experienced by owner/operators. The guaranteed benefit is having peace of mind with your next project and an end result to be proud of. When BETCO takes care of your project you can rest assured that we will manufacture, ship and install every component with the utmost attention to quality.

CONSULTATION

From field offices across much of the United States, our sales representatives are involved in every phase of every project. Because they are professionally trained, they are in a position to go well beyond the point of sale.

DRAFTING AND DESIGN

Our design department designs efficient, innovative and durable metal buildings and has the practical experience to understand how good design filters down to the details. BETCO provides complete, sealed drawings, including foundation plans for the permitting and inspection processes.

BUILDING

Our craftsman buildings are skillfully designed with detail from the slab up. Everything from single story buildings to large, multistory facilities, conversions, boat and RV storage and much more.

COMPONENTS

All self-storage building components are manufactured in our state-of-the-art plant in Statesville, North Carolina. We use the finest materials and manufacturing processes.

INSTALLATION

BETCO is not only a manufacturer, but we also install our own buildings with a pool of professionally trained and certified construction crews. And because we schedule our crews to coincide with your delivery, your building will be installed to meet your timetable.

TECHNOLOGY

We use the latest technology on all of our design and manufacturing processes.
